Platform Growth, Ecosystem Strategy & AI Integration Leader

Platform growth and ecosystem strategy, and technical success leader with 18+ years driving enterprise AI and API-led transformation on the MuleSoft Anypoint Platform. Proven track record architecting customer engagement strategies — working closely with the SI partners embedded in enterprise accounts — that translate integration gaps into platform consumption growth — directly driving 19% YoY expansion across enterprise accounts.

Deep technical fluency across API-led connectivity, cloud infrastructure, and AI/LLM integration architectures, combined with a track record of influencing product roadmap through structured Voice of Customer programs and enterprise field pilots.

Recognized for building trusted relationships with C-suite and enterprise architects, defining reference architectures, and orchestrating cross-functional alignment across Product, Sales, and Alliances to accelerate MuleSoft adoption at scale.

Leadership Impact

- **Architecture-Led Platform Growth: Translated customer integration gap analyses — including insights from SI partner implementations within those accounts — into targeted adoption roadmaps, directly driving 19% YoY growth in MuleSoft platform consumption across enterprise accounts.**
- **AI Platform Adoption & Iteration:** Partnered in deploying a proprietary AI support automation platform — driving adoption within the Cloud Success team, running iterative model tuning cycles to optimize query deflection and reduce operational workload at scale.
- **Voice of Customer → Roadmap Strategy:** Established a structured feedback pipeline from enterprise field signals to MuleSoft Product Engineering, translating recurring architectural pain points into prioritized roadmap inputs and pre-GA pilot programs.
- **Executive Customer & Ecosystem Strategy:** Serve as a trusted technical advisor to C-suite executives at global enterprise accounts , defining AI-ready integration architectures and positioning MuleSoft as the foundational connectivity layer for autonomous agent infrastructure.
- **Cross-Functional Execution:** Built and led a hybrid global Cloud Success team across multiple regions, developing the matrixed leadership and stakeholder alignment necessary to unblock complex cross-functional product rollouts.

Core Expertise

• AI Strategy & Enterprise Adoption	• MuleSoft Anypoint Platform	• Voice of Customer & Roadmap Influence
• AI-enabled Customer Platforms	• Enterprise Integration Architecture	• C-Suite Executive Advisory
• Intelligent Automation & Agents	• APIs, Microservices, Event-	• Cross-Functional Leadership

	Driven Systems	
• Conversational AI & LLM Integration	• AWS, Azure and Hybrid Architectures	• SLA & Service Delivery Management
• AI-powered Knowledge Systems	• Kubernetes and Cloud Infrastructure	• Account Analytics & Performance Metrics
• Enterprise AI Integration Architecture	• Partner & Ecosystem GTM Strategy	• Agile & Scrum Delivery

Professional Experience

Salesforce — San Francisco, CA

Consumption Value Senior Manager

2025 – Present

Lead strategic enterprise customer engagements focused on platform growth, AI enablement, and integration strategy — collaborating with the SI ecosystem embedded within those accounts — for customers leveraging the MuleSoft platform and broader Salesforce ecosystem.

Key Achievements

- Drove 19% YoY growth in MuleSoft platform consumption by architecting integration expansion roadmaps that identified and closed capability gaps, translating architecture reviews into concrete upsell, product adoption, and joint-partner delivery opportunities.
- Serve as a strategic GTM partner to Sales and Alliances teams, using customer architecture assessments — including evaluation of their SI partner implementations — to define joint integration use cases that position MuleSoft as the connective layer for AI-ready enterprise transformation.
- Define reference architectures for AI-driven enterprise integration scenarios and deliver technical proofs of concept that accelerate customer adoption of new platform capabilities.
- Engage C-level executives and enterprise architects as a trusted technical advisor, translating complex integration and AI requirements into platform-aligned solutions that expand footprint and create multi-year consumption commitments.
- Collaborate cross-functionally with Product, Sales, and Customer Success to surface field-derived integration patterns, feeding market signals back into platform roadmap priorities and co-innovation opportunities.
- Champion AI-powered use case development — spanning automation, predictive intelligence, and conversational workflows — positioning MuleSoft as the foundational connectivity layer for agentic enterprise architectures.

Technical Manager – Cloud Success

2022 – 2025

Led a global Cloud Success organization driving platform health, AI-enabled operations, and enterprise customer outcomes across MuleSoft's cloud and hybrid deployments.

Key Achievements

- Acted as the primary Voice of Customer conduit to MuleSoft Product Engineering, aggregating enterprise field signals — recurring architectural pain points, integration failure patterns, and feature gaps — into prioritized product feedback that influenced roadmap decisions.

- Partnered in deploying a proprietary AI automation platform within the Cloud Success team — leading adoption, running iterative utterance testing, and fine-tuning the model through successive cycles to automate routine customer queries and deflect escalation complexity.
- Reduced average customer issue resolution time by 62% (16 days → <6 days) through AI-assisted diagnostics and workflow redesign.
- Piloted new MuleSoft platform capabilities with enterprise customers ahead of broad release, gathering structured field validation data and coordinating feedback loops between customers, Cloud Success, and Product teams.
- Increased CSAT from 4.5 → 4.65 by building proactive engagement programs that surface customer risk earlier.
- Scaled a hybrid global Cloud Success team across multiple regions, managing cross-functional stakeholders, SLA governance, and operational performance metrics.
- Led migration of MuleSoft customer support data from legacy ticketing platform (NA101) to the consolidated OrgCS platform, coordinating cross-functionally with Engineering and Operations to ensure continuity of support operations and improved self-service capabilities.

Lead Customer Architect

2021 – 2022

Provided senior technical leadership supporting enterprise MuleSoft deployments and resolving complex architectural challenges.

Key Achievements

- Served as a structured Voice of Customer channel to MuleSoft Product Engineering, documenting high-frequency integration failure patterns from enterprise escalations into actionable product improvement requests that influenced bug fixes and feature enhancements.
- Partnered with Product teams to pilot emerging platform capabilities with select enterprise customers, gathering real-world architectural feedback that shaped feature refinement prior to general availability.
- Led resolution of high-severity enterprise escalations involving complex multi-cloud integration architectures.
- Mentored support engineers and improved technical capability across the global support organization.

Senior Customer Architect

2020 – 2021

Served as a trusted technical advisor to enterprise customers deploying MuleSoft integration platforms.

Key Achievements

- Supported enterprise integration deployments across AWS, Azure, and hybrid cloud environments.
- Improved system reliability and operational efficiency for enterprise integration platforms.
- Delivered internal training programs that increased MuleSoft certification levels across the support organization.
- Identified and implemented process improvements improving troubleshooting efficiency and knowledge sharing.

Customer Architect

2018 – 2020

Delivered advanced technical support and platform expertise for enterprise MuleSoft customers.

Key Achievements

- Provided troubleshooting expertise for enterprise integration pipelines, APIs, and middleware environments.
 - Built knowledge base resources improving support onboarding and resolution efficiency.
 - Led root cause investigations for critical enterprise incidents.
-

Earlier Career

Technology Lead — Mphasis (First Republic Bank) San Francisco, CA | 2017–2018

Project Lead — Cognizant (CarMax) Richmond, VA | 2016–2017

Integration & Development Lead — Cognizant (ING Bank) Belgium | 2012–2016

TIBCO Developer — Cognizant Netherlands & India | 2010–2012

Software Engineer — Dell India | 2007–2010

Education

Artificial Intelligence: Business Strategies and Applications

UC Berkeley Haas School of Business

Executive MBA – Startup Entrepreneurship & Strategy

Quantic School of Business and Technology

Bachelor of Engineering: Computer Science

Visvesvaraya Technological University
